EDUCATION

Purdue University

West Lafayette, IN

Bachelors of Science: Computer Science | Mathematics | Data Science

Aug. 2022 – Dec. 2025

- **GPA:** 3.6/4.0 | **Honors:** Dean's List (4x), Semester Honors (4x)
- **Relevant Coursework:** Data Structures and Algorithms, Machine Learning and Data Mining, Probability, Statistics, Systems Programming, Computer Architecture, Linear Algebra, Object-Oriented Programming in Java, Programming in C

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL, TypeScript, JavaScript, HTML/CSS

Frameworks and Libraries: Tensorflow, PyTorch, Flask, NextJS, React, MongoDB

Softwares and Cloud Platforms: Microsoft Azure, Jupyter, Google Firebase, Github, UNIX

Certifications: Akuna Capital Options 101 and 201 Course Completions

EXPERIENCE

AT&T

Dallas, TX

Software Engineering Intern

June 2025 – Aug. 2025

- Developed a new chatbot system using **LangChain** and open source LLMs via **Ollama**, which eliminated ongoing token expenses of ~\$2 per use, leading to an expected \$150,000 of savings
- Explored and engineered a multi-model quorum framework for **hallucination detection** of this new chatbot, incorporating prompt engineering and **FCS scoring** for response validation, leading to a 8% increase in output accuracy
- Presented technical findings, system design, and analysis of cost savings directly to AT&T's CTO, demonstrating strong communication skills and business impact
- **Intern Innovation Challenge:** Worked on a team to build a predictive cybersecurity map in **Dash and Streamlit** with chatbot integration. Implemented **RAG** for the chatbot by using multiple data streams and built a user friendly UI for cyber analysts

MISO

Carmel, IN

R&D Machine Learning Intern

May 2024 – Jan. 2025

- Reduced error of company's future forecasting methods of future energy demand by 16% by integrating Meta's **NeuralProphet** model into their existing architecture. Leveraged **Azure ML Studio** to access Blob storage and test machine learning models
- **Intern Data Challenge Winner:** Led a group of 4 interns to win MISO's "Intern Data Challenge" by creating an interactive geographic map in **Folium** which presented predictive analysis of future generator usage in MISO's footprint

PROJECTS

PrepOlympiad | React, TypeScript, MongoDB, AWS, Stripe

Mar. 2025 – Present

- Developing a LMS for Olympiad preparation that connects middle and high school students with experts across the country
- Created a full stack web application which allows middle and high school students to practice problems, track individual progress, and find curated resources to science Olympiads such as USABO, USAPhO, and USNCO

SyllabAI | NextJS, Tailwind CSS, Flask

Feb. 2025 – Mar. 2025

- Developed a simplistic platform for students to combine their college syllabuses into one document for ease of access
- Used OpenAI GPT-4o-mini model API key to parse and process each syllabus into individual sections for combining
- Created **REST API** routing through a Flask server to access parsed data and post to the frontend

Purdue Robotics Club Website Development

Sep. 2023 – May 2024

- Collaborated with a team on the comprehensive redesign of the Purdue Robotics Club (Purdue ARC) website, employing **HTML, CSS, and React** for a dynamic user experience
- Contributed to the development of a back-end registration form for the 2024 Robotic and Intelligent Systems Expo (RISE), facilitating participation from companies, labs, and clubs through a secure Google Firebase server for data collection and storage

Machine Learning at Purdue (ML@P)

Jan. 2023 – Aug. 2023

- Collaborated on a team to develop a **GAN** to diagnose medical issues from eye images using capabilities from **Tensorflow**
- Collaborated with a different team to create a chatbot using an innovative transformer model for our discord channel
- Used Zero Shot Classification from HuggingFace to generate API calls for the chatbot and classify new inputs

AWARDS AND HOBBIES

5-time Qualifier for American Invitational Mathematics Exam (AIME)

Mar. 2018 – Mar. 2022

National Mathcounts Qualifier

May 2018

Hobbies: Basketball, Tennis, Painting, Poker, Chess
